What is KDSS, Does my vehicle have it?

The Kinetic Dynamic Suspension System (KDSS) is a hydraulic sway bar system developed by Toyota to enhance on-road handling. If you own a 5th Gen 4Runner, GX470, or GX460, your vehicle may be equipped with KDSS. One easy way to identify if your vehicle has KDSS is by inspecting the front sway bar. If the sway bar is connected to the lower control arm, your vehicle is equipped with KDSS. If it's attached to the spindle, then your vehicle does not have KDSS.

For the 200 Series Land Cruiser in the U.S., all models are equipped with KDSS.
