

IMS59-60710 FITTING INSTRUCTIONS

Toyota Tundra 2007-2021

Toyota Sequoia 2008-2022

Dobinsons shock absorber IMS59-60710 is supplied with multiple spring seat height grooves.

1. Set your spring seat height.

A). Circlip Position 1 puts the spring seat at the standard spring seat height position. This is used for standard height coils and for Dobinsons coils to achieve the lift heights listed in the 4x4 suspension catalogue.

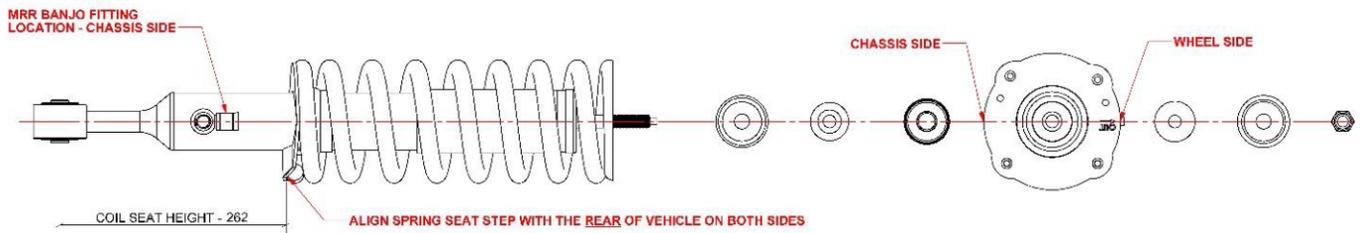

B). Circlip Position 2 will raise the vehicle around ½"an inch from Circlip Position 1

C). Circlip Position 3 will raise the vehicle around 1 inch from Circlip Position 1

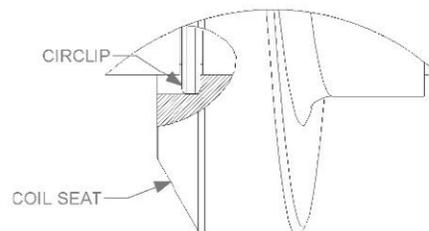

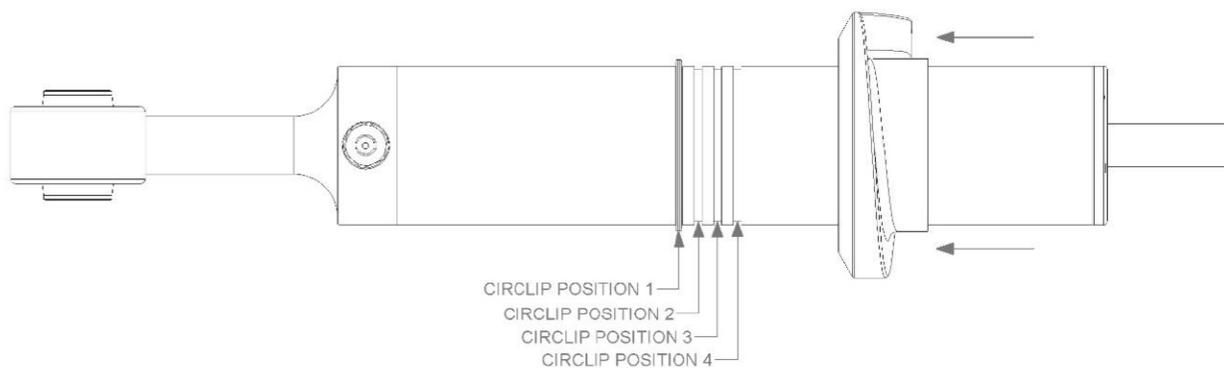

D). Circlip Position 4 will raise the vehicle around 1½" inch from Circlip Position 1

2. Align the spring seat so the step in the spring seat is in the same position as the standard shock absorber.

3. Assemble the shock absorber components in the same order as original.
